2 Reason for discontinuation

The producer of the isoplexer required to support the chipset used in the above listed modules has announced the end-of-life of the component. Since no alternative components are available, u-blox is being forced to announce the end-of-life for the above listed products.

3 Customer impact and recommended action

u-blox recommends to migrate to the new SARA-U201-04B successor product, which uses a state-of-the-art chipset.

The migration is straightforward because:

- The successor product is pin-to-pin compatible to its predecessor
- The successor product includes the same feature set as the discontinued products. It also includes many additional features and certifications.

Putting successor product into use requires the associated customer product approvals and certifications.
